

After being informed that my favorite radio station may be forced off the air, I'd like to share why the station is so important to me. I have been a consistent listener of AIR1 radio over the last 2 years. As a college student, listening to music is not only encouraging, but as a Christian station it helps me have a positive attitude.

Locally, AIR1 broadcasts community events to the Salem area as well as information about campus events (Western Baptist College). I feel that without AIR1 many of those events go unheard of.

Without AIR1 I would have a radio station to listen to. There are others that play commercials, but they don't have the right focus. I wouldn't want little kids listening to those other radio stations either. AIR1 is always appropriate for little children.

I feel it is in the FCC's best interest to continue to allow AIR1 to play all across the USA. My sister who is in Idaho can listen to the same station and hear the same great songs even though we are miles apart. AIR1 is encouraging and life changing.

Please consider adding AIR1 to the new radio translator service or keeping the FM translator service the same. Thank you.
